

Contract for Brad Schmidt

We propose to make an Android application for Brad Schmidt at the Colorado Division of Fire Prevention & Control with the following understandings:

What we propose to make and/or do:

An Android application that can convert chosen geospatial-PDF file(s) into geo-TIFF file(s) and save them to a specific location. This will be delivered by April 16th, the deadline for the CMU student showcase.

What we need from Brad Schmidt to accomplish this task

*TAK Android application access for testing.
Commitment of time during the development phase for reviews and changes.
Files used previously (pre/post-conversion) for testing/verification.*

What will happen when these guidelines change

Any changes in requirements/guidelines must be agreed to by both parties. Depending on the nature of the change(s), previously agreed to requirements may need to change as well.

What we expect in compensation

Nothing.

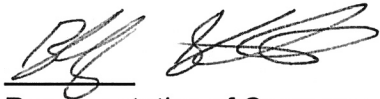

What limitations we have

We are a student team and this is a student project. This project comes with no particular guarantees, including in particular warranty or suitability for a particular purpose, or long-term support.

Ownership and Fair Use of Intellectual Property

The Intellectual Property created during this project (for example software, business processes, and artwork) is granted permanently for use and extension for the business owner, but is ultimately owned by the respective creator(s) who are not limited to reuse or extend this work elsewhere.
